

WHAT ARE FCL & LCL

LCL & FCL are terms used to describe the quantity of goods being transported and the corresponding shipping arrangement.

FCL (Full Container Load) is used when a shipment fills an entire container, providing direct transport without sharing space, ideal for larger shipments due to cost efficiency and reduced cargo handling.

LCL (Less Than Container Load) is for shipments that don't fill a full container, grouped with others for cost-effectiveness. It's beneficial for smaller shipments, allowing flexible shipping while retaining individual tracking benefits.
